

Nexo Centros Veterinarios, Spain

Laura Zimblytė, Graduate of the Faculty of Agrotechnologies

I chose Spain for a few reasons: to improve my Spanish language skills, to get more knowledge about this country and culture, to get better acquainted with Spanish people and to enjoy nice weather. I studied veterinary medicine at Vilniaus Kolegija/ University of Applied Sciences for three years and I am very happy that for the final practice I chose to go abroad.

I traveled with my best friend, we had a very good time during seven months: we went to practice to veterinary clinic, we worked about four hours in the morning and three hours in the evening, during the day we had a break of three hours, so at this time we were going to do some sports. In the weekends we used to move out of town, we had a lot of adventures and opportunities to meet new people, and of course to broaden our minds.

I was very satisfied to be there and to work in a really good clinic with very pleasant veterinary doctors. Despite the Covid-19 we had the opportunity to see a lot of wonderful places and to move freely and unrestrictedly from one city to another for some time. In my opinion, Erasmus programme can give you the chance to improve yourself, your skills, to see how brave you are, to learn new things and completely change your attitude to some things. I certainly do not regret that we had chosen to do a traineeship abroad with Erasmus. I want to say a big thank you to this Erasmus programme, because during this time I learned a lot and found the people who would help me if I ever wanted to come back there one day. My suggestion for all students is to not consider to go or not to go abroad, just do it and you will see how much it can change your life and the way of your thinking.
