

**Ege University Hospital in Izmir, Turkey**  
**Greta Kulakovskytė, graduate of Health Care Faculty**

Erasmus internship is one of the best and most important opportunities. Moving abroad within the Erasmus Exchange Programme is the best thing someone can do. First of all Erasmus is a great addition to your CV, it will give you the opportunity to meet people from all over the World, to make new friends, to have fun, to Exchange culture, to learn a new language.

Izmir is more like a youthful city, all people during the day seem in a rush, chasing their dreams yet even more energetic in the evening. Turkey is a beautiful country with a rich history. People in Turkey are very hospitable and helpful, including workers at labs which made this experience even richer. They always were able to teach us everything you need to know for your future carrier as a biomedical technician.

If I had to talk about Ege University, it would take a long time because it is a perfect place to study or do internship, but not only for this, the people I have met and atmosphere all around the university makes this place unforgettable. I love that I was an Erasmus student at Ege University because at the same time I had a chance to participate in different acitivies. I have made so many memories and met loads of nice people I will remember for life.
